**BLANK PISTOL  
USER MANUAL**

## WARNINGS

- 1 Read the warnings and instructions in the manual before using your pistol
- 2 Learn about the carrying guns laws in your residence country
- 3 In case of neglect concerning the instructions there might be many unpleasant results
- 4 If you have no experience in using gun ask for help from a specialist
- 5 In order not to turn the gun harmful keep it away from people, animals because any incident or accident caused by the gun the place around it also gets damage. Do not underestimate the usage instructions.
- 6 Hide the bullets in a way that no children will have access to them
- 7 Always hold the gun assuming that it's fully loaded
- 8 Do never jocke or play around with a gun (pistol). Behave yourselves when it comes to guns and any explosives (the devil does not load the gun but human does and he forgets)
- 9 Apart from the shooting moment do not keep your finger on the trigger. And don't pull the trigger before pointing the barrel to the target.
- 10 Before firing or pulling the trigger make sure there are no babies, animals or anyone who might not be happy with the noise or you will be charged guilty instead for that.
- 11 Your firing position should be straight and stretched arm position and should be above the eye level (Picture 2) or upwards straight and stretched position above the head and ears level (Picture 1) do not ever fire near to your body not head (Picture 3)
- 12 You might face some hearing problems due to it's loud noise
- 13 Due to the gases and explosive substances spread from the gun it might cause dangerous and harmful results, choose a closed and non AC area to perform your shooting.
- 14 Gathering and delivering the case to the dustbin is a healthful environment care gesture.
- 15 This gun was not design to cause any throwing of a part or substance from it's barrel. Any problem apart from the usage of the gun the manufacture shall take the responsibility.
- 16 The material used in product are not the same with the ones used for real guns. So if any change you did try to use as real will damage on your self and the people around you
- 17 The right to make any change or improve anything on the gun belongs to the manufacturer.

## SAFETY (hummer safety)

In the Picture 4 as it shows when the safety (triger) is pressed the hummer safety goes downwards and to fire it has to be pulled upwards.

## LOADING THE BULLETS AND USAGE

Place your finger on the charger and (Picture 5) and hold it from the lower part and remove.(for 9.cal Load 15 round) load the charger with the bullets(6) and push it untill you hear confirmation Tik sound.

In order to drive the bullets to the barrel pull it completely and leave it (Picture 7) from now on you are ready to fire. And just pulling the triger is enough to fire. For each bullet you should pull the triger once (semi auto's nature)

When the bullets finish the sleeve will remain opened and letting you know that it's empty. (Picture 8) and you can bring the sleeve bar to the old position just by pressing the signal aside of it (Picture 9)

## REMOVE / SETTINGS

- Picture 5 press the button shown and remove the charger
- Picture 12 pull the part slightly and level line it up with the hull. 13-as shown in the Picture push the part on the hull and remove it from the hull.
- 14 pull the part as shown in the Picture and hold it upwards. 15 as shown in the Picture 15 first pull back and then take up the mechanism and the part is ready to be cleaned.
- 16 - In order to remove more parts more than shown in the Picture 16 you'll need some hand equipments. And while removing the parts there might be few damages on your hands and also the parts might get lost so putting all this together the manufacturers do not advise to remove the many parts of the pistol.
- 17 and to reset the gun or put the parts together you just have to do all the steps on contrary.

## MAINTENANCE

- Keep your pistols away from acid, wet and powdery environment
- After firing specially oil the lean part of the barrel where the bullets strike
- After cleaning the hul, charger and all the working parts oil them.
- Do not leave the charger loaded with bullets when not using
- In case the pistol stop working try another manufacture's cartridge  
And if it does not work also then take it back to the manufacture and do not use a high volume(barlt) of cartridge for shooting.
